

Human influencing machines: Vacuum Cleaner →

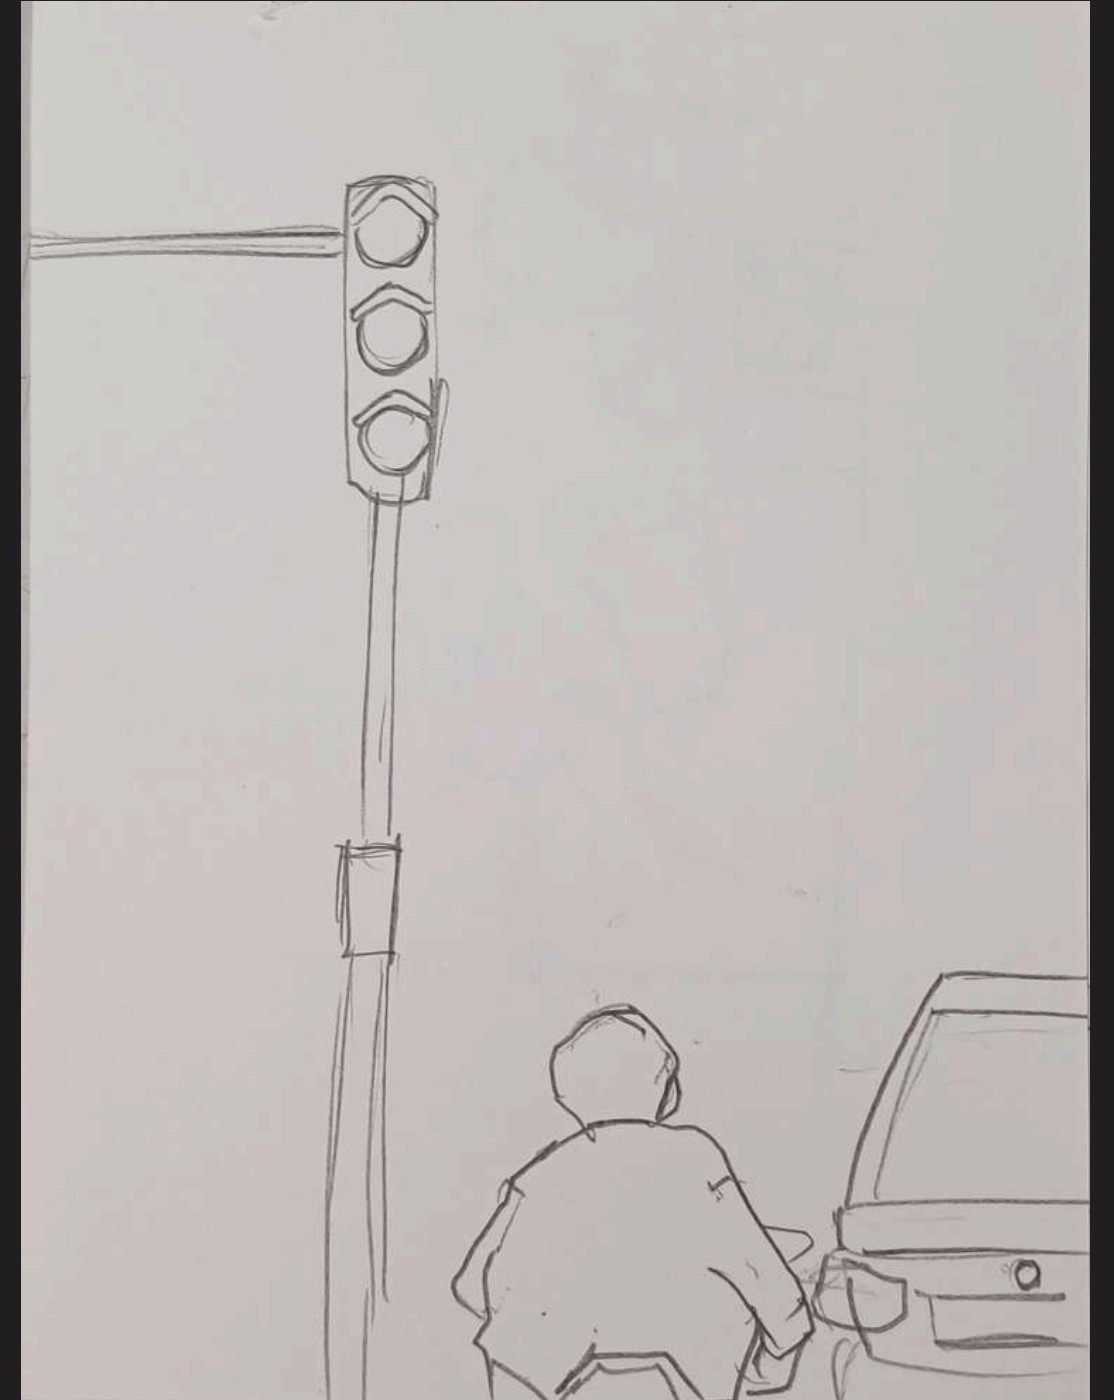

A person vacuuming the floor using a vacuum cleaner is largely in control of the machine in their hand. The person operates the vacuum cleaner for their cleaning chores, the machine itself doesn't have much autonomy.

Machine Influencing Humans: Traffic Light

Fixed time traffic light is a machine that has an authorized control over people's actions. The people in the traffic are expected to and largely obey the traffic light's rules.

Machine and Human Influences each other: ATM

An ATM can be used to withdrawn money as per the person's needs, but the machine exerts some conditions and limits to which money can be withdrawn. For example, asking for a PIN. If you put the wrong PIN three times, you aren't allowed to withdraw money for the day.
